[Watch the tutorial on youtube](#)

18g Wire Armature for Spine, and Leg with middle toe bend

12g Wire for toes (two front sides and one in back)

\*if making feet with fewer toes, consider using all 18g, just know the legs and ankles will be bulkier.

\*We do not have a kit because we want to really encourage creative exploration.

We suggest one of our [MC-1 Studio Packs](#) as a great color theme.

\*Note that in bird legs...the knees bend backwards :)

Have fun and please use #waffabirds so we can see what you make!
