In this tutorial, we are exploring how to make prefelt! Prefelt is a partially felted piece of felt fabric, that can be incorporated into future wet felting projects. It still has "felt-ability" as Marie says! You can use wool roving, batting, or commercial prefelt to create a unique prefelt of your own, and add surface design embellishments of silks and other luster fibers. This project is fast and easy and gives you leaves you with a beautiful one-of-a-kind prefelt that you can incorporate into your future felting projects.
